

VOLVO P1800

**- from idea to prototype
and production**

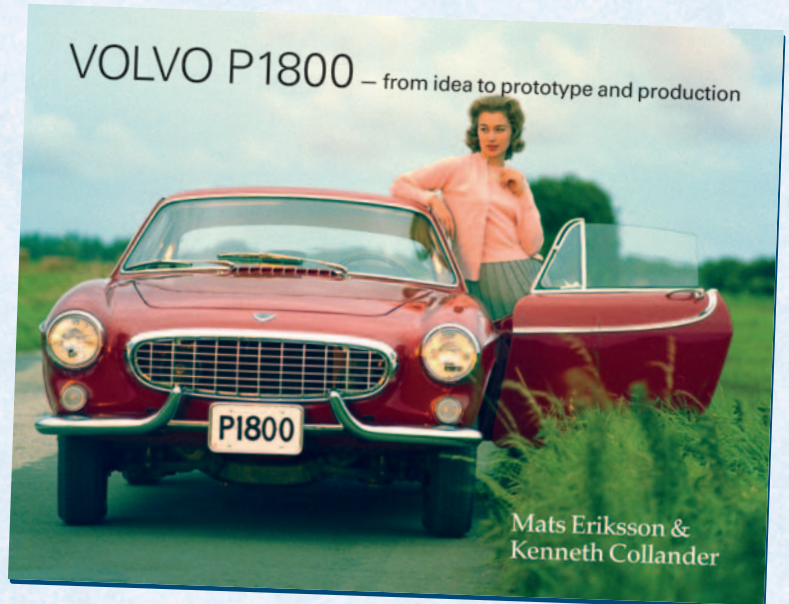

Authors:

*Kenneth Collander and Mats Eriksson,
for the Swedish Volvo P1800 Club*

This brand new book tells the story of the Volvo P1800, about the time when the first idea was born and the process that led up to its design, engineering and the first years of series production. A story which had no given answers, a story full of dramatic and exciting events, a story filled with challenges and problems.

Get ready to learn how it all really happened, based on materials from archives at Volvo which never have been officially presented before. The story brings the reader back to 1956 and covers the events up to 1963, letting the people who were part of the project and process behind it tell what really happened. The 280 page book is richly illustrated and filled with over 500 photographs. A must have item for a Volvo enthusiast.

The Volvo P1800 was officially shown for the first time at the Brussels Motor Show in

January 1960 and launched in May the year after. This is why we celebrate its 50th anniversary in 2011. The book is published by Trafik-Nostalgiska Förlaget in Stockholm in cooperation with the Swedish Volvo P1800 Club.

The book is the Swedish Volvo P1800 Club tribute to the Volvo P1800, to the people who made the car, put it into production and created the myth; and the enthusiasts of the world that care for the Volvo P1800, its heritage, its history and its future.
